

ESTANCIA ALPACA PILLOWS

Standard R1000

King R1400

Why use Alpaca fiber in bed pillows?

- **Hypoallergenic for allergy prone individuals, especially those allergic to sheep's wool and feathers.**
- **The fiber has a medullated core. fully or partially hollow. deterring dust mites. which are the leading cause of asthma and allergies in the bedroom.**
- **The porous fiber creates an extra insulative value for a constant balance of temperature-no more head sweats!**
- **Alpaca fiber is naturally fire retardant.**
- **No chemicals, dyes or bleaches are used in the the processing of our fiber.**
- **Alpacas are sheared (much kinder to the animal compared to leather pillow production) once a year and the wonderful fleece is sorted. washed. carded and the filled into our 300 thread count percale cotton pillowcases**
- **No prickly factor as with leather pillows poking through your pillowcase.**
- **Highly breathable.**
- **Perfect balance between support and comfort.**
- **Available in soft, medium, and firm support.**
